

**Review questions for the article,
“What makes us human?”**

By Katherine S. Pollard

1. According to the article, what percentage is quoted as the difference between human and chimpanzee DNA?
2. What is the relationship between chimpanzees and humans? How long ago did they evolve separately?
3. Based on the article, DNA sequences have played a pivotal role in human evolution. Discuss at least 4 of these sequences and their role in human evolution.
4. What is your reaction to the article? (minimum 1 paragraph answer)
